

Solar Insurance

Cover for installing solar equipment and systems, while in operation, as well as any financial losses incurred due to business interruptions.

Indigo Brokers' Solar Insurance Cover is a specialized policy crafted to safeguard photovoltaic plants, installed according to stringent national standards. Our comprehensive coverage protects against physical loss, machinery breakdown, and potential business interruptions.

We extend this protection to include essential technical peripherals such as mounting frames, plant-specific fasteners, cabling (AC and DC), transformers/inverters, remote monitoring surveillance (IoT), and protection systems (CCTV, electric fencing, fire protections, etc.), ensuring your entire solar infrastructure is covered.

Cover includes:

- **Erection All Risks:** Covers the installation phase of PV equipment and systems, shielding your project from risks during construction.
- **Operational All Risks:** Ensures continuous protection for PV equipment and systems while in operation, mitigating potential damage or loss.
- **Business Interruption:** Covers financial losses arising from indemnifiable claims or incidents, providing crucial support to maintain business continuity during disruptions.

Cover requirements:

To qualify for our Solar Insurance Cover, all installations must comply with:

- **SABS Regulations:** Installed per South African Bureau of Standards regulations.
- **Manufacturers' Specifications:** Built to meet the specifications set by equipment manufacturers.
- **Engineering Standards:** Conformity to industry engineering standards ensures reliability and safety.
